Policies to Prevent and Respond to Childhood Lead Exposure

An assessment of the risks communities face and key federal, state, and local solutions
About this Project

• Goal:
  o To assist with federal, *tribal*, state and local decision-making by providing new information regarding policies for the prevention of and response to childhood lead exposure.

• Study Scope:
  o The impact of the policies on children’s life paths (e.g., educational outcomes)
  o The impact of the policies on equity
  o The cost-effectiveness of the policies
10 Policies to Prevent and Respond to Childhood Lead Exposure

An assessment of the risks communities face and key federal, state, and local solutions
